

“Silla Plegable”

Andrés Galilea
2021
Binderjetting Metal

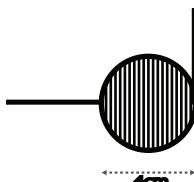

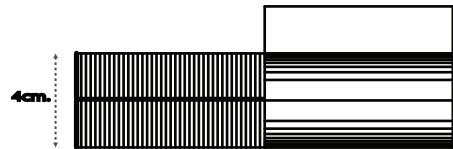

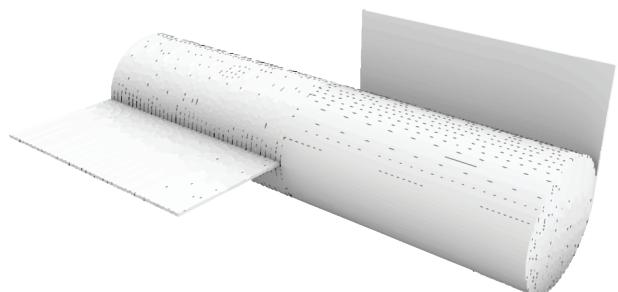

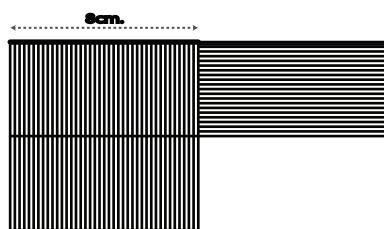

Esta silla es común y corriente, solamente que yo le di el concepto “Silla Plegable”, debido a que esta se puede guardar (cerrar), pensada para lugares con poco espacio. Su forma y diseño es simple, el asiento es de madera con forma rectangular, y la bisagra será impresa en 3D, con un material de metal para que pueda resistir a tres personas (200kg. aprox.).
